is our cup of tea

quality • service • value

brocks compass provides management solutions designed directly to reduce your work load. Manufacturing and information systems are innovatively combined to ensure projects of any size flow smoothly from concept through to completion.

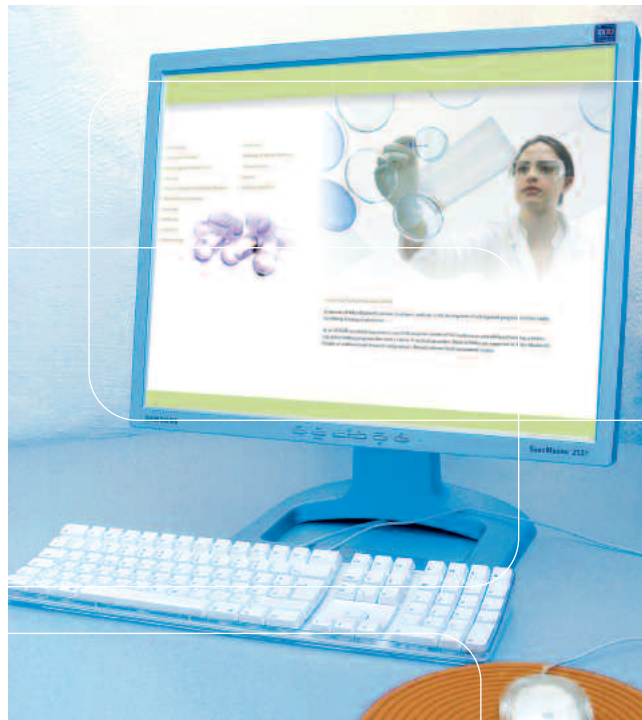

design

quick and concise visual communication

We see design as a critical factor in your customers perception of what differentiates you from your competitors.

Understanding typography, print, colour and image has literally given us a hands-on advantage where we believe creativity is nothing but function working with form. We understand your needs, advise and offer workable, cost-effective solutions to your projects so that the end result works for you and with you.

brochures > books > flyers > leaflets > packaging > letterheads > business cards > invitations > ads
annual reports > folders > newsletters > point of sale > logos > stationery > corporate identities

print

flexibility, consistency and efficiency in print

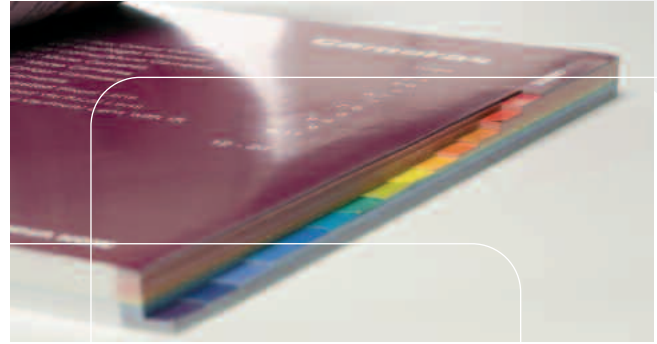

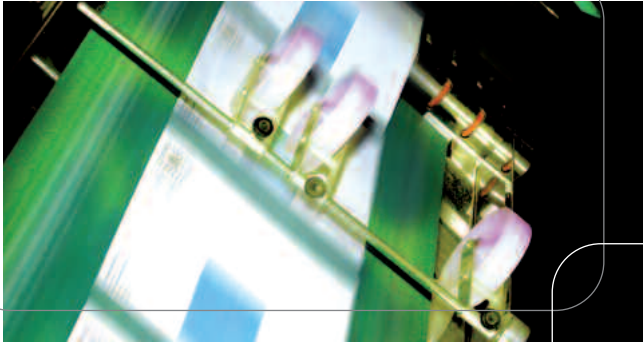

- > technology developed to deliver the ultimate in customer service.
- > our integrated IT systems maintain continuous links between production equipment and customer services.

The technology advantage enables brocks compass to outperform expectations, delivering breakneck turn around across our entire range of print facilities. Whether it be ultra-short-run bespoke digital, or long-run, high-capacity litho, All our operations are streamlined to optimise performance. We routinely handle anything from lights-out, data-driven digital work flows to mass-mailing catalogue production.

Komori 1028P 10/0 5/5 & Komori 528P 5/0 3/2 > K-Station remote monitoring with integrated CIP3 pre-setting digital workflow > KMS computerised press monitoring
